

FIRST AID

Food Industry & Restaurant

CEDERROTH

First Aid & Burn Station

The First Aid Station is designed for workplaces where there is a risk of burn injuries and/or where food is processed, such as in catering kitchens, the food industry, and workshops.

Cederroth Burn Gel for Burns

- Dressing provide rapid cooling and effective pain relief for burns
- Cools as effectively as lukewarm water, speeding the healing process

Soft Foam Bandage

- Elastic self-adhesive bandage, giving maximum freedom of movement
- The smart dispenser makes it easy for you to cut just the right length
- The bandage can be used for all kinds of minor wounds and will stay in place in water

Plaster for burns

- Protects and soothes minor burn injuries
- The wound pad consists of a hydrogel that covers the skin's nerve fibres and helps to soothe
- Provides faster wound healing
- The wound pad does not adhere to the wound

Blue plasters when handling food

- Blue plasters are easier to see and they can be detected by most metal detectors used in the food industry

- 2 Pair of Gloves
- 1 Scissors (REF 270002)
- 1 First Aid & Burn instructions

Accessories:

- Wall bracket (REF I90400)

Restaurant & food industry

Very common restaurant hazards include cuts, slippery floors, sharp equipment, heavy lifting and burns. Crowded and stressful environments are often an underlying factor behind accidents. Detectable, blue plaster should be used and is often mandatory in the restaurant and food industry as they are easy to detect if they come off.

Common risks:

Sharp implements and machinery

Food preparation usually contains plenty of cutting, slicing, peeling and dicing, where one small mistake can lead to serious injury.

Hot surfaces, oil, hot water and steam

Hot surfaces, oil, hot water and steam can cause burns. Cleaning around deep fat fryers is a risk area that often leads to burns.

Chemicals as cleaning agents

Cleaning agents including dishwasher and oven cleaners are highly corrosive, as are disinfectants used in the food industry. They can all cause severe eye injuries. A buffered Eye Wash that has a neutralizing effect on alkalis and acids is far more effective than flushing eyes with tap water. Having a high quality Eye Wash to hand for immediate emergency flushing increases the chance of saving vision.

Scan the QR code to read more about the different industry branches.

CEDERROTH

Eye Wash Station

Buffered liquid increases the chance of saving your eyes!

Cederroth Eye Wash works to neutralise the eye's pH value, i.e. it has a neutralising effect on alkali or acid splashes, giving a quicker result than a normal sodium chloride solution.*

- If you have an accident with a substance that contains calcium (for example, cement, concrete or lime), you can safely rinse with Cederroth Eye Wash as it is 100% phosphate-free
- The integrated eye cup guides the liquid towards the eye without any unnecessary waste. The eye cup helps to keep the eye open while rinsing
- Bottles will open automatically when twisted out of the brackets to enable immediate rinsing
- **Shelf life** of 4.5 years

Scan the QR code to see an instruction film about Cederroth Eye Wash Station.

Neutralising effect#

Cederroth Eye Wash Station
REF 721500

Dimensions: W 29 x H 56 x D 12 cm

2 Cederroth Eye Wash á 500 ml (REF 725200)
1 Salvequick Plaster Dispenser incl.
1 (x 40) Textile Plasters (REF 6444)
1 (x 45) Plastic Plasters (REF 6036)
1 Eye Wash Instructions
1 Refill key

The effect is generally stronger on alkalis than acids.

CEDERROTH

Eye Wash & Wall Bracket

Cederroth Eye Wash Cabinet
REF 51011040

A compact dust and water protected Eye Wash Cabinet.

Recycled plastic gets new life in First Aid products

*Since 2022, the green coloured plastic in Cederroth Stations and Dispensers has been made from more than 85% recycled plastic. We are now taking the next step and are beginning to replace the plastic in the transparent doors with 100% recycled plastic. From the summer of 2025, the plastic in Cederroth First Aid Stations and Dispensers will therefore be made of >92% recycled plastic. Using recycled plastic reduces the climate impact compared to using newly produced plastic. Read more about our sustainability journey at cederroth.com.
