

PLATTERS

To support the continued evolution of the delivered food and catering markets, our platter ranges offer high-quality, recyclable solutions that help you to elevate the presentation of your food.

Breakfast Buffets

Get your meetings, conferences and events off to a strong start by using our platters to present an inviting breakfast buffet for your team or attendees. They are suitable for packaging a variety of foods and provide a high-quality finish to elevate your breakfast displays.

The small and extra small platters work as cost effective ¼ and ½ inserts for the large platter bases across both ranges, helping food to be contained but separated within one large platter. The platters can be used in conjunction with our other packaging such as pots to create individual portions of porridge, fruit, or yoghurt.

Lunchtime Spreads

Whether you are looking for packaging for workplace lunch delivery or event catering, our platters have been developed to suit a variety of lunchtime foods.

Three of our platter sizes have been designed to neatly fit standard catering sandwich configurations. The large accommodates 12 sandwich rounds (48 quarters), the small holds 6 sandwich rounds (24 quarters), and the extra small fits 3 sandwich rounds (12 quarters).

Medium platters are also available and are ideal for customers looking to package other foods for picnic style lunches, parties, and snacks for workplace spreads.

Platters – versatile packaging for food developers and chefs.

Our platter ranges suit expanding menus that showcase a variety of new foods across different day parts.

Our traditional platters range has been redeveloped to support operational efficiency and visibility, and we have introduced a new, light platters range to support cost reduction.

Manufactured in the UK at our BRCGS AA+ certified factory, our platters are made using high-quality, food safe materials.

Recyclability & Packaging Extended Producer Responsibility (pEPR)

Our platters are recyclable and are 'green' in the Recycling Assessment Methodology. They have easily separable windows within the sleeves and lids, meaning they are part of the 'paper and board' material category for pEPR too.

Afternoon Sweet Treats

For customers selling sweet treats, our platters are suitable for presenting cakes, doughnuts, or even fruit displays.

They are also ideal for local bakeries looking to hand deliver treat boxes to customers, or caterers providing grazing platters for home catering events such as birthday celebrations or baby showers.

PLATTER BASES AND SLEEVES

Our traditional platters have been redesigned to support operational efficiency. The bases are quicker to construct, and the sleeves now have a self-erecting crash lock at one end and a simple tuck closure at the other. Pop-out handles also support hygiene needs and the platters are well suited to labels for tamper evidence and allergen or ingredient information.

Lids and sleeves are interchangeable with both styles of bases - see next page for lids.

	Large Platter Sleeve	11912	Kraft board, white to interior Non-GMO PLA window	461 x 348 x 83mm	50	●	●

LIGHT PLATTER BASES AND LIDS

To provide more variety and support customers with cost reduction, we have also developed a light platters range. The bases utilise less paperboard, offering a lightweighted option, and the lids have an even simpler construction meaning they can be easily added and removed to protect and reveal the food contents.

Lids and sleeves are interchangeable with both styles of bases - see previous page for sleeves.

OUR CERTIFICATIONS*

KEY ▶

Although Colpac makes every reasonable attempt to test its products for a range of typical applications, Colpac cannot control the specific applications for which its products are used. Therefore, it is the customer's responsibility to test the suitability of a Colpac product for the customer's specific application.

SHORT SHELF-LIFE

Products with a shorter shelf-life.

LONGER SHELF-LIFE

Product with a longer shelf-life.

EXTENDED SHELF-LIFE

Products with an extended shelf-life.

COMPOSTABLE

The paperboard material in these products is commercially compostable within 90 days (EN13432 standard), where facilities are available.

COMPOSTABLE WINDOW

The film material used for these products is commercially compostable within 90 days (EN13432 standard).

RECYCLABLE

The plastic lids/window films used for these products are recyclable.

RECYCLED LID

The lids for these products are made from recycled plastic material (rPET).

RECYCLABLE BOARD

The board for these products is recyclable.

RECYCLED BOARD

The board for these products is made from recycled material.

SUITABLE FOR MICROWAVE

The product is suitable for microwave use.

SUITABLE FOR OVEN

The product is suitable for oven use.

SUITABLE FOR HOT CABINET

The product is suitable for use in hot cabinets

SUITABLE FOR FREEZER

The product is suitable for freezer use.

Glossary

In our material descriptions we use abbreviations, this glossary explains the materials.

GMO - Genetically Modified Organism

PE - Polyethylene

PET - Polyethylene Terephthalate

PLA - Polylactic Acid

PP - Polypropylene
