# KIOSK SYSTEM TOUCH SCREEN

## SMART KIOSK SERIES

ELEGANT DESIGN AND A WIDE RANGE OF ACCESSORIES FOR A SURPRISING EXPERIENCE.

The touch screen Smart Kiosk series is the new family of innovative and versatile products, designed to guarantee the direct connection between the point of sale and the consumer, offering an interactive and engaging experience. The ideal solution for optimizing management processes, improve the service and create a direct relationship with their own clients.

### ELEGANCE AND FLEXIBILITY

The compact design integrates a bright 21.5" or 27" touch display that offers a simple and direct interaction method. Intel® or Cortex processors provide the maximum performance and total reliability in the Windows operating environment or Android. It can be connected via WiFi or Ethernet to provide an immersive experience without interruptions. Immediate access to components makes operations easier simple and quick maintenance.

### IDEAL FOR

Retail

Horeca

GDO

Entertainment

Services

### PROCESSORS

### SUPPORTED OS

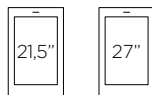

- Win 10 IoT Enterprise
- Win 10 Pro

Android 12

### MONITOR

Monitor 21,5" o 27"  
Touch Screen

### AVAILABLE IN TWO COLORS

Glossy Black

Glossy White

# THE MAXIMUM OF CUSTOMIZATION

THE WIDE RANGE OF ACCESSORIES AVAILABLE  
ALLOWS YOU TO CREATE A SYSTEM THAT FITS IN  
EVERY NEED

## 1) PAYMENT TERMINAL OR SMART CARD READER

The payment terminal can be installed on one side or frontally, to enable the possibility to carry out transactions. An excellent system to minimize waiting queues applicable in different situations, from fast food to public administration. Alternatively, it has some reserved space for the pin pad, that can be used for smart card reading.

## 2) NFC MODULE

The standard contactless module can be used to manage retail collection points through loyalty cards, as well as in large-scale distribution, for reading prepaid cards or badges and, in general, to interact with smartphone or wearable devices, of staff or customers.

## 3) TAX PRINTER OR PRINTER 160 MT THERMAL

The ground pedestal or the appropriate stand for installation on the counter or on the wall allows you to integrate the fiscal printer or the high-performance thermal printer a not accessible solution for public and protected by a security key

## 4) BARCODE READER

As well as creating a price check point, it allows to provide all the information that customers need. From available products or pairing advice in fashion, to the list of ingredients to use in a recipe, in food and retail sectors. Can enable online orders, read loyalty cards and coupons with discounts.

## 5) 80MT THERMAL PRINTER

In retail it is an excellent solution to allow store product information or receipts of pre-orders and online orders. In offices and public administrations offers the possibility of printing reminders regarding your reservations, exams and appointments.

## 6) CAMERA

It is the essential integration for all applications such as virtual reality, increasingly widespread in make-up and in clothing.

It can be used to regulate access facial recognition or to capture the image and issue cards and personalized digital documents.

# A FLEXIBLE SYSTEM, EVEN IN INSTALLATION

SMART KIOSK TOUCH SCREEN IS THE MODULAR AND VERSATILE SOLUTION DESIGNED FOR ADAPT TO ANY TYPE OF ENVIRONMENT

The elegant and compact design of the touch screen Smart Kiosk offers countless configuration opportunities and installation to meet different needs, not only in retail and catering, but also across sectors such as healthcare, entertainment, services and much more, optimizing management processes and improving the consumer experience.

## A) SMART KIOSK TOUCH SCREEN WALL

Maximum freedom of movement, even in small environments. The Smart Kiosk central unit can be placed on the wall to allow you to take advantage of and fill all your spaces.

## B) SMART KIOSK TOUCH SCREEN DUO

The solution that multiplies your sales potential. The support base is designed to create a double-sided version of Smart Kiosk, halving its space, through the installation of two central units.

## C) SMART KIOSK TOUCH SCREEN LITE

Ergonomic and elegant. The lightweight version of the ground support allows you to lighten the aesthetic impact by concentrating the accessories in the central unit and reducing space.

## D) SMART KIOSK TOUCH SCREEN DESK

Flexible and versatile on every support. The central unit of Smart Kiosk can be placed on a counter to create completely self-service stations independent.

## E) SMART KIOSK TOUCH SCREEN FLOOR

The solution tailored to your reality. The floor stand allows configuration with a wide range of accessories and customization of front graphics to the best fit into the environment.

Smart Kiosk allows three installation methods: wall-mounted (VESA), self-standing, or on a shelf. Each configuration can be integrated with various accessories, including the payment terminal and the tax printer.

# A MINIMAL AND COMPACT DESIGN, PERFECT FOR ANY ENVIRONMENT

## RETAIL E GDO

Great for checking prices, availability and information or place self-service orders. Thanks to applications that use virtual reality allows you to view garments and accessories worn or different types of make-up.

## FOOD AND HOTEL SECTORS

Ideal for improving the service, it offers customers the possibility of consulting the menu and ordering, managing changes and additions and paying pre-order directly with debit card or credit card.

## WELLNESS CENTERS AND GYMS

Excellent for creating information points without staffing needs. Allows you to book i services independently and enable access to reserved areas through facial recognition or reading badges or wearables.

## WAITING ROOMS AND OFFICES

Indispensable for queue management, for booking tests, visits and appointments through document scanning, or to speed up payment procedures.

## MUSEUMS, THEATERS, EVENTS

The smart solution for management and purchasing tickets for events and shows, to create information points in museums, theatres, during events or at a fair.
