FOR MORE THAN 60 YEARS IN MEAT PROCESSING COMPANIES

ABOUT US:

Our family-run company with headquarters in Lohr am Main in Lower Franconia, Germany, was established in 1945. For more than half a century we have successfully installed our special floor systems on many millions of square meters in all areas of the meat processing, sausage and poultry industry. We provide advisory service to project planners and owners of large industrial companies, but also of small and medium-sized crafts enterprises of the meat processing industry at every project stage for new buildings, renovations or extension projects.

OUR PROGRAM:

Industrial floors in the meat processing sector must comply with a multitude of requirements and criteria. This is valid in particular since legal stipulations for the design of floors in meat processing facilities have come into force and must be met with regard to meat hygiene regulations. Above all, industrial floors in meat processing companies are to be impermeable to water and slip-proof, withstand mechanical, chemical and thermal loads, meet a very high hygienic standard, be as cost-efficient as possible, but nevertheless be made of particularly long-lasting materials. Being a company with own installation teams specialized in floor coatings in meat and food producing companies we have met this requirement profile Europe-wide for more than 60 years.

SEITZ + KERLER

**Distribution
and installation
of special floors**

New construction of a production plant in 2008 and 2019 with 66.000 m².
Due to the requirements, 3 floor systems were used: Monile® Special floor, Seilo PUR polyurethan concrete, Seilo® CRYL acrylic resin floor coating

**Distribution
and installation
of special floors**

Several million sqm of special floor for all areas in the meat processing industry!

OUR OFFER OF SERVICES FROM A SINGLE SOURCE:

- > MONILE® special floor – proven on many 1,000,000 m², extremely durable and robust, with lasting anti-slip properties and vapour-diffusible
- > SEILO PUR polyurethane concrete for extreme thermal and chemical loads, indestructible and permanently hygienic
- > SEILO® CRYL acrylic resin coating, fast curing and durably elastic, decorative and loadable
- > SEILO® POX epoxy resin coating, versatile and stable, impregnating or permanently protective
- > SANITILE® WB hygienic coating for walls and ceilings in the meat processing industry
- > SEILO TEC industrial screeds and subfloor concretes

REGULARLY INSPECTED:

All Seilo® floor systems are regularly inspected and tested by accredited examination institutes and meet today's requirements of the food processing industry. Some of the tests that our systems passed successfully are listed in the following:

- Approved for application in the food processing industry according to regulation EC 852/2004, Polymer Institute Germany, thus complying with the International Food Standard (IFS)
- Requirements according to Article 31 paragraph 1 of the Lebensmittel- und Futtermittelgesetzbuches (LFGB) (German food and feed code) are met - Institute Nehring Germany 
- Classification of the reaction to fire according to EN 13501-1, Bfl-s1, CSTB France
- CE certification according to EN 13813, CSTB France  
- Slip resistance classes R1 0-R 13, BGIA Germany
