

Honeycomb

Pure nature, straight from the beehive

Practical honeycomb displays. Simple as that!

Easy Removal of Honeycomb Pieces

Thanks to the stainless-steel backplate pieces of honeycomb can easily be removed with a spoon. Honeycomb enthusiasts suck the honey from the comb and chew the beeswax which contains valuable propolis. The remaining beeswax can either be spat out or chewed thoroughly and swallowed. The honeycomb can also be enjoyed as a spread on bread. (Picture 01)

Liquid Honey Straight from the Comb

As soon as the honeycomb cells are cut open, the honey begins to flow. Thanks to the design of the honeycomb display the flowing honey can easily be collected in a container (Picture 02)

Information for Guests

An information display is available to provide guests with helpful guidance (Picture 03)

Easy Handling of the Whole Honeycomb

The whole honeycomb is simply slid into the display holder, keeping the delicate comb securely in place at all times. The stainless-steel display is easy to clean. A suitable plastic storage box is also available for safely storing partially used honeycomb between buffet service times.

Honeycomb

2/3 honeycomb, approx. 1.8–2.3 kg blossom honey (Austria/Germany)
2/3 organic honeycomb, approx. 1.8–2.1 kg blossom honey (Austria)

PancakeMaschine

Fresh, hot pancakes on request

A highlight for your buffet & lounge

Für Ihr Buffet.

The pancake machine is easily operated by the guest with a simple hand gesture. Through ein a viewing window, guests can watch their pancake being freshly prepared.

Flexible Pancake Options

The pancake size can be continuously adjusted from 4.5 cm up to a maximum of 21 cm. The desired level of browning and the number of freshly baked pancakes per button press can be programmed

Easy to Use:

The pancake machine is filled using a specially designed bag of pancake batter. Simply add water to the pancake mix. The machine heats up and is ready for use within just a few minutes. As the batter remains in the bag, the machine requires very little cleaning.

Compact:

The machine weighs less than 23 kg and has compact dimensions (L 53 cm × H 36 cm × W 36 cm). It simply plugs into a standard 230 V power outlet.

Warming Plate:

The machine can produce one pancake in as little as 20 seconds. During peak periods, such as seminar breaks, the warming plate can be used as a buffer. Pancakes can be prepared in advance and kept warm to reduce waiting times, temporarily increasing the machine's capacity during busy periods.

Für Ihr Buffet.
