HOGA

All businesses via one channel

How do you monitor your targets and keep track of different businesses? With HOGA, you can view all businesses in real time and evaluate purchases with just a few clicks. You can evaluate the quality of all deliveries in one central location. Digital goods receipt inspection allows you to systematically monitor the quality of all deliveries.

Product costs at the touch of a button: Analyze the purchases of all your stores with just a few clicks.

All product data is automatically transferred to your systems.

Data quality:
Your supplier takes care of data maintenance according to your standards.

Automated quality assurance for incoming goods allows you to use the evaluations of deliveries in supplier discussions.

Control the ordering behavior of your stores by specifying which stores see which product range.

Keep everything in view.
