# THRILL BRANDING

## Make your brand unique

### LASER MARKING

- Versatility: This technique can be used with extreme precision on both stainless steel and wooden surfaces.
- Fine Detail: It is the ideal solution for faithfully reproducing customer logos featuring complex or very small graphic elements.

### LASER CUTTING

- Permanent Structure: The stainless steel body allows your logo or brand to be permanently engraved directly onto the machine body.
- Visual Impact: The logo is fully backlit with LED technology for maximum visibility.

### BACKLIGHTING

- Colored LED Technology: We use advanced LED systems and colored opal diffusers to ensure maximum color accuracy.
- Faithful Reproduction: Every laser-cut logo is backlit to faithfully reproduce the customer's visual identity.

### CUBE LOGO

- Technology: The logo is reproduced on a high-strength polycarbonate panel and then backlit with LEDs.
- Advantages: This technique allows extremely fast production times and is also available for single-unit orders.
- Finishes: Applicable to stainless steel units or units with a matte white or black finish.

# THRILL Quick Guide to CO2

Abb. 1

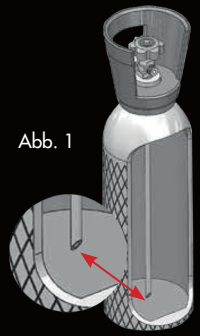

Abb. 2

**Certified Efficiency: THRILL** uses CO2 to ensure fast, effective, and professional sanitizing and cooling.

**Cylinder Requirement:** It is essential that the cylinder is equipped with a dip tube (siphon tube) in order to draw CO2 in liquid form directly from the bottom of the container (Fig. 1).

**Flow Control:** Dispensing is precisely managed by a solenoid valve included with the machine, to be connected to the cylinder through the standard fitting supplied. (Fig. 2)

**Safe Installation:** The connection is made using a special nylon fitting; make sure it is properly tightened to prevent any possible gas leakage.

The type of connection for the CO2 cylinder varies depending on the geographical area:

Mod. A

EU Standard (Europe except the Czech Republic and Slovakia), Africa, the Middle East, Australia, Thailand, South America (except Venezuela and Peru), Hong Kong, Singapore, etc.

Mod. B

USA, Canada, Venezuela, Mexico, Peru, Saudi Arabia, Central America, Bahrain..

Mod. C

China.

Mod. D

Russia, Armenia, Czech Republic, Slovakia, Finland.

Mod. E

Japan, South Korea.
